

CD80D Dri-Prime® Hush-Pac

The Godwin Dri-Prime CD80D pump is an extremely powerful yet compact pump with flow capabilities to 96 m³/hr and discharge heads to 36 metres.

The CD80D features the unique Godwin high pressure oil bath mechanical seal design. This allows for dry running for prolonged periods while automatically priming and repriming. Able to perform in the toughest conditions, the CD80D can handle solids up to 40 mm in diameter. This makes it an extremely effective pump, suitable for both slurry and clean water applications. The powerful CD80D has proven itself a pump of choice for small dewatering and bypass applications.

Features and Benefits

- Fully automatic priming from dry to 8.5 metres suction lift.
- Godwin Dri-Prime is a continuously operated Venturi air ejector priming device which requires no periodic adjustment or control.
- Extensive application flexibility. It will handle sewage, slurries and liquids with solids up to 40 mm in diameter.
- Dry-running high pressure oil bath mechanical seal, with high abrasion resistant silicon carbide faces.
- A Close-coupled centrifugal pump with Godwin Dri-Prime system mounted to a diesel engine or electric drive.
- All cast iron construction (stainless steel construction option available) with cast steel impeller.
- Also available as a openset, bareshaft pumpend or highway trailer.
- Standard build engines; Kubota Z482. Other engine options are available.

Specifications

Suction connection	80 mm (3" BS10 Table 'D')
Delivery connection	80 mm (3" BS10 Table 'D')
Max capacity	96 m ³ /hr
Max Head	36 metres
Max Solids handling	40 mm
Max Impeller diameter	166 mm
Max operating temp	80 °C
Max working pressure	4.0 bar
Max suction pressure	2.8 bar
Max casing pressure	6.0 bar
Max operating speed	3000 rpm
