

Basic pump repair & spares kits

Godwin SD150M Dri-Prime® Pump – Spares key features

High quality parts

Xylem guarantees that all parts in a basic repair kit are genuine Godwin parts or genuine parts from OEM manufacturers.

Lower costs

Handling and administration costs as well as price per item are all lower when compared to purchasing parts separately. Additional costs savings by purchasing spares at point of pump sales.

Quick and easy installation

All kits come with mounting instructions showing parts drawings and layout for ease of installation. Kits can be installed with basic tools and tool kits are also available.

Save time

All parts in one box means reduced administration and eliminates the risk of having to wait for delivery of individual parts when you need them most. Simpler logistics also save time.

Fast delivery

When you need service kits, you want them fast. All Godwin basic repair and spares kits are stocked in our distribution centers for direct and fast delivery.

Simpler handling

Spares contained in a single package or kit means easier storage and easier physical handling. One-part number makes ordering simpler.

Xylem Recommends:

Stocking Basic Repair & Spares Kits by purchasing at point of pump sale and maintaining pumps and engines in accordance with the manufacturers' guidance. Keeping parts on hand for when they're needed dramatically reduces downtime and unnecessary shipping costs. Servicing the equipment following the recommended intervals ensures the optimal performance of the pump and maintaining the warranty validity.

Basic pump repair & spares kits

Godwin SD150M Dri-Prime® Pump - Spares key features

1-2 Years Basic Repair Kit

Service Intervals: 1-2 Years*

Ref. Number: PRK-001

The Godwin **Basic Repair Kit** restores your pump to optimum performance by providing you with the most common original wear items required for **basic maintenance and repairs**. The cost is lower than buying the parts separately. Xylem recommends servicing your pump every 1-2 years* of normal pump usage.

The **Basic Repair Kit** for the Godwin Dri-Prime® SD150M contains:

- Non-Return Valve (NRV) seat, ball and O-Ring.
- Ejector ball, jet and nozzle; jet and nozzle O-Rings; and separation tank filter.
- Compressor pipe and compressor belt.
- Pressure relief valve.
- O-rings and gaskets for wearplate.

Ejector Service Kit

Service Intervals: 1000-2000 hours*

Ref. Number: EK17

The Godwin **Ejector Service Kit** allows for fast replacement of the **Dri-Prime® venturi system and the screen gasket** for minimal downtime. Xylem recommends servicing the ejector every 1000-2000 hours* for ensuring optimal performance.

The **Ejector Service Kit** for the Godwin Dri-Prime® SD150M contains:

- Ejector, nozzle, collar.
- Filter (gasket included in the build).
- O-rings.
- Ejector seat and ejector ball.

Non-return Valve (NRV) Service Kit

Service Intervals: 1000-2000 hours*

Ref. Number: VK05

The **Non-return Valve (NRV) Service Kit** provides you with all the necessary parts to replace the **non-return valve (NRV)** of your Godwin Dri-Prime® Pump. Xylem recommends servicing the NRV every 1000-2000 hours* to ensure optimum performance.

The **NRV Service Kit** for the Godwin Dri-Prime® SD150M contains:

- Non-Return Valve (NRV) seat, ball and O-Ring.
- Spring washers.

Basic pump repair & spares kits

Godwin SD150M Dri-Prime® Pump - Spares key features

Mechanical Seal Kit

Service Intervals: 2000-5000 hours*

Ref. Number: SK59

The Godwin **Mechanical Seal Kit** is designed to provide you with all necessary parts for **servicing the mechanical pump seals** for diesel and electric driven pumps. To avoid unexpected failures and ensure optimal performance Xylem recommends servicing the mechanical seal of the pump every 2000-5000 hours*.

The **Mechanical Seal Kit** for the Godwin Dri-Prime® SD150M contains:

- Mechanical seals and lip seals.
- O-rings, body gasket and wearplate shims.
- Impeller shims, bolt and washer.
- Speedi sleeves and Dowty washers.

Bearing Service Kit

Service Intervals: 5000-6000 hours*

Ref. Number: BK02

The Godwin **Bearing Service Kit** allows for service of the motor adaptor of your Godwin Dri-Prime® pump and fast replacement of the **bearing** with minimal downtime. Xylem recommends servicing the bearings of the pump every 4000-5000 hours*.

The **Bearing Service Kit** for the Godwin Dri-Prime® SD150M contains:

- Bearing taper roller, lip seal and lip seal sleeve.
- Circlip.
- Bearing cover shims.
