

Field Smart Technology

FOR YOUR PEACE OF MIND

You deserve to know how your pump is performing. The new generation of Xylem Field Smart Technology (FST) is an advanced telemetry and cloud based system that allows you to monitor and control your pump from anywhere in the world. In the middle of the night. In the middle of a storm. At your most remote site.

With FST, your phone, tablet, or computer gives you the visibility, control, and peace of mind you need, no matter the conditions. Users can now select just the services they want, and can reach a customer service representative at any time, day or night.

This is why we have fitted all the Godwin S Series Dri-Prime pumps with FST to expand and enhance the capabilities of all your critical dewatering needs.

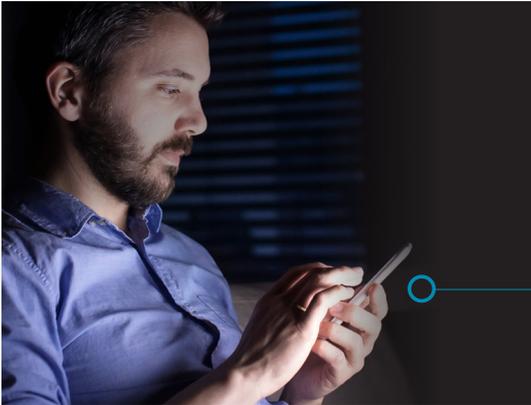

New flexible subscription plans allow the user to select only the monitoring and control features and services they need. With a modern look and feel to the website, the system is easy to use on all common web enabled devices. Real-time pump and engine performance data can alert users with automated phone calls in addition to text and email messaging. Remote access to the devices is achieved through cellular and satellite connections and allows the user to save time in diagnosing problems, minimising the amount of personnel exposure on job sites. And with a 24/7 FST support center your pumps are "Always On and Close By", providing peace of mind at anytime and anywhere in the world.

Features and benefits

- Maintain uptime of your pump and fleet, and increase asset utilisation
- Optimise maintenance schedules and reduce operational costs
- Alert to sub-optimal operating conditions
- Manage risk and improve safety
- Locate the pump at any time, and any place
- Remotely start, stop or change pump speed
- Monitor key engine and pump parameters
- Receive alarms via Text, Email and Automated Telephone Alarming
- User selected subscription plans
- 24/7 customer support line
- Multi-language: English, French, German, Italian and Spanish

Let's Solve Water

Manage your pump anywhere, anytime with the new generation of Field Smart Technology

FST integrates with pump & engine controller, and provides invaluable control and information about your pump. With remote monitoring and control from any smartphone, tablet or desktop computer, it's nothing short of amazing.

Turn it on. Turn it off. See flow rates, fuel levels and more.

Solving water may be tough, but being smart about it has never been easier. Outsmart water even from your couch.

Remote Engine Monitoring and Control

Speed | Coolant Temperature | Battery Voltage
Oil Pressure | Engine Hours | % Load | % DPF Soot
Fuel Rate | Fuel/DEF Levels*

Start | Stop | Accelerate | Decelerate
Engine Diagnostic Codes

Remote System Monitoring

Flowrate* | Turbidity* | pH Level* | Fluid Temperature*
Pressure* | Total Suspended Solids* | Sump Level*

Remote Pump Monitoring

Suction/Discharge Pressure* | Vibration RMS*

Alarms and Notifications

Text | Email | Automated Telephone Alarming

Multi-Language

English | French | German | Italian | Spanish
