QI150 - 150mm Enclosed Automatic Priming Pump

The SPP AUTOPRIME QI150 pump is a fully enclosed diesel driven pump unit with high efficiency, designed to pump most liquids including sewage and semi solids. The enclosure provides sound reduction and security for use in noise sensitive areas. Typical uses are removal of ground and rain water from excavations, trenches, footings, manholes and ponds etc. May also be used for stream and pipe diversions and flood water control, well point dewatering, pipe relining and sludge pumping.

DESIGN FEATURES

- Bunded unit on two wheel road trailer with fixed height towing eye or 50mm ball hitch.
- Alternative trailer for the QI150 with variable height draw bar is available (adds 35 kg to weight).
- 12 volt battery starting by key switch with optional automatic start/stop facility.
- Pump will pass solids up to 65mm diameter and 80mm long.
- Reliable double mechanical seals which allow dry running.
- Pump can be left running when liquid is exhausted and will prime automatically when liquid is present.
- Rugged construction requires minimal operator maintenance.
- 65 cfm Vacuum Pump with coalescer and air filtered before exhaust to atmosphere.
- Features efficient 'Smartprime' technology for energy saving and reliability.
